

## Launching of Seed and Planting Material Information System at Department of Agriculture

On October 14, 2016, Seed and Planting Material Information System (<http://www.ewisl.net/dom/>) has been launched on the occasion of the opening ceremony of National Agriculture Information and Communication Centre, Department of Agriculture at which Hon. Duminda Dissanayake, Minister of Agriculture was attended.

JICA Vegetable Seed Project has supported the development of the system by which the Department of Agriculture officers will be able to overview the latest information of the seed and planting material, such as seed tests records, producers, and stock. The efficient update of the information of seed and planting material will be beneficial to the timely and efficient planting by the producers.
